HIGH RISK FOOT CATALOGUE

Prosthetic and orthotic solutions for an active and independent lifestyle
Oapl has a comprehensive range of offloading devices for acute and chronic wounds which utilise local offloading and immobilisation principles.

In 2019, the International Working Group on the Diabetic Foot (IWGDF) introduced new global diabetic foot guidelines for offloading treatment of diabetic foot ulcers. The guidelines state “The TCC had been considered for decades the gold standard offloading intervention to heal a neuropathic plantar forefoot ulcer (19, 58). Our previous guideline broadened the recommendation to a non-removable offloading device (19), to include both a TCC and a prefabricated removable knee-high walker rendered non-removable with an appropriate foot-device interface.

* Please visit the iwgdfguidelines.org for the full guideline and references.
OPED DIABETIC BOOTS

The VACO boots by OPED provide comfortable and cast-stable treatment for the patient. VACO12 vacuum technology provides cast stability from a vacuum cushion that contains polybeads that adapt around the patient’s anatomy within the boot. Air is extracted out of the vacuum cushion to create a firm interface around the foot and ankle for an intimate fit. This reduces shear and distributes pressure evenly. Each polybead is in contact with 12 surrounding beads, absorbing impact and weakening energy.

Features and benefits of the diabetic range

- Excellent pressure distribution due to VACO12 polybeads
- High volume of polybeads increase support and resilience to weight bearing activity over time.
- Successful wound healing due to excellent pressure relief
- Black, shear-free velour liners for fragile skin that is changeable for hygiene.
- Easy to remove and apply for wound inspection
- Toe piece for protection and hygiene
- Rocker sole is removable for better hygiene (heavy duty available for longer wear)
- Foam insole for additional offloading
- Possibility of lockable buckle for patient compliance
- Clinically proven results*

Description

The VACOped diabetic is a cast-stable functional orthosis for immobilisation of the foot and ankle with the option to adjust the ankle ROM.

Indications

- Diabetic Foot Syndrome
- Charcot Foot
- Ulcerations on the foot
- Post-operative care after toe and forefoot amputations
- Achilles rupture

Code | Size
--- | ---
VPTC-01-4-S | S
VPTC-01-4-M | M
VPTC-01-4-L | L

Description

VACOcast diabetic is a cast-stable orthosis with patented VACO12 technology that provides similar benefits to total contact casting.

Indications

- Diabetic Foot Syndrome
- Charcot Foot
- Ulcerations on the foot
- Post-operative care after toe and forefoot amputations

Code | Size
--- | ---
VPCD-01-4-S | S
VPCD-01-4-M | M
VPCD-01-4-L | L

Description

VACOpedes diabetic is a short boot designed for pressure relief for forefoot injuries and forefoot plantar ulcers without compromising ankle dorsiflexion and plantarflexion.

Indications

- Forefoot Plantar wounds
- Pressure relief in the forefoot area
- Immobilisation of the forefoot with full mobility in the ankle

Code | Size | Mens US | Womens US

VETCO-01-4-S | 3.5 - 6.5 | 4.5 - 7.5
VETCO-01-4-M | 6.5 - 10.5 | 7.5 - 11.5
VETCO-01-4-L | 10.5 - 15 | 11.5 - 16

*Orthopaedic range is available
OPED BOOT ACCESSORIES

STRAP LOCK
Replace the ankle strap with the strap lock. Loop the strap through the buckle and lock it in place with the key. The key can be kept until the patient returns for review. The strap maintains the boot in situ for compliance.

*Suitable for Square Toe Shoe.
**WOUND CARE SHOES**

**HEIDELBERG SHOE**

A Rehabilitation shoe with flexible quality walking sole. There are three inlays inside the shoe offering comfort and accommodate volume fluctuations. The upper insole is made of neoprene and both lower insoles are made of EVA. This shoe is suitable for patients with wounds to the forefoot area and swelling.

**LEIPZIG DIABETIC SHOE**

Rehabilitation shoe with flexible sole, three inlays can be adjusted or removed. The patient can wear the shoe with wound dressings as the dorsal fasteners offer generous adjustability. Leipzig shoe features a reinforced heel counter, zippers in the heel to Achilles tendon area and adaptable insoles that offer local pressure relief. Adhesive felt works well in the Leipzig for pressure offloading.

HEEL OFFLOADING

RCAI MPO ACTIVE 2000

The RCAI MPO 2000 Active features a blue breathable foam liner that wicks moisture away from the skin while maintaining skin integrity. The MPO 2000 Active floats the heel to eliminate pressure or friction on the heel, allowing blood circulation vital to healing. The dynamic flex action supplies continuous counterforce to the plantar surface of the foot assisting in the correction of foot and ankle contractures and deformity. The adjustable toe post relieves pressure on the toes and can be positioned to the side in the treatment of malleolus and lateral ulcers. The rotator bar positioned to the side, controls hip and leg rotation, providing functional alignment.

HEALPRO BED RESTING AFO

A foot and ankle positioning orthosis designed to unweight the heel and protect the foot from potential ulcers and / or loss of dorsiflexion range of motion. This unique design suspends the heel and reduces pressure on the toes from bed linen to facilitate comfort and protect skin. Designed primarily for patients spending long periods of time in recumbent position.

HEEL CUSHION - OAPL

The OAPL heel cushion is a cost effective device ideal for protecting the “at risk” foot and ankle. It has been designed to enable easy donning and doffing and allowing the clinician a visual check of the heel being off loaded. Available as a single item or in a case of 4 it can also be combined with the OAPL de-rotation wedge to control rotation of the hip and leg.

HEELIFT SUSPENSION BOOT

Available in a smooth or convoluted (original) foam. The Heelift Suspension Boot is designed to provide an effective solution for prevention and assistive healing of pressure ulcers at the heel, while delivering positioning and alignment of the lower limb.

It is made from latex free medical grade foam with a friction free tricot base to ensure it stays in place at all times as well as improving client mobility. Comes with an extra pad to control hip rotation, foot drop or provide added elevation. One size fits all.

HEELIFT GLIDE ULTRA

Heelift Glide Ultra has UltraTec, water-repellent interior lining which is soft and comfortable and aids in patient compliance. It also further assists in maintaining proper foot position and is easy to wipe clean. The outer lining slides through sheets limiting rotation of the boot and keeping it in place. Autoclavable.

THERAFIRM CORESPUN

Soft, comfortable everyday socks for men and women with the benefit of true gradient compression. Core-Spun, moisture wicking yarns make the product ultra-stretchy, and easy to don. True gradient promotes better circulation and helps prevent swelling and leg fatigue.
